

QUALITY COMMERCIAL R.O.

Tomar's TWM-100 commercial Reverse Osmosis water purifier is the result of years of experience with the needs and requirements of small scale commercial pure water users. This includes restaurants, coffee shops, misting and humidification systems, laboratories, and many other users that must have consistent high quality water for their operations. The key factors of reliability, servicability, and consistent performance with minimum user intervention are achieved in the solid design of the TWM-100. All components are mounted on a heavy gauge stainless steel frame to provide the structural strength and corrosion resistance appropriate for a commercial appliance.

FEATURES

The Tomar TWM-100 Reverse Osmosis system includes the following important quality features.

- **Stainless Steel Wall Mount Frame**
- **Low Energy, High Flow Membrane**
- **3.2 Gallon Bladder Tank**
- **Automatic Hydraulic Shutoff Valve**
- **Product Water Check Valve**
- **Teflon Tube Flow Control**

SPECIFICATIONS

Production Rate:	100 Gallons/Day (Free Flow)
Rejection:	98% Typical
Recovery:	20%
Feed Pressure:	65 PSI Nominal
System Dimensions:	15.75"H x 14"W x 5"D
System Weight:	11 lbs. (Dry)
Tank Size:	3.2 Gallons
